

**exacqVision START Description**

Combining the ease of use of exacqVision VMS software with the essential features necessary for low-cost video surveillance, exacqVision Start VMS software is ideal for stand-alone installations of up to 16 analog and 16 IP cameras. The complete supported list of IP cameras can be used with an easy auto-scan to detect and configure. Live views, saved views, exacqRecall instant playback, video search, POS/ATM search, configuration, exacq Mobile apps, all included. Windows, Linux or Mac.

- START-01                      Singe Start IP camera license
- START-PRO Upgrade      exacqVision START to PRO Upgrade, per IP camera

**exacqVision PRO Description**

exacqVision Pro VMS (Video Management System) software comes pre-installed on all exacqVision A-Series Hybrid Servers and IP Servers, the enterprise-level Z-Series Hybrid and IP servers, and is available on the EL-S/EL-SR hybrid and EL-Series IP embedded appliance servers. exacqVision Pro VMS can also be purchased separately for installation on commercial off-the-shelf (COTS) servers running Windows or Linux. Includes free web services and android/ios mobile client (Requires CPU upgrade on EL series).

EVIP-01                      Single IP camera license

**exacqVision Enterprise**

**Description**

The exacqVision Enterprise Server option, introduced with exacqVision Version 4, adds server and user administration functionality ideal for an enterprise deployment of exacqVision Pro VMS.

EVES-01

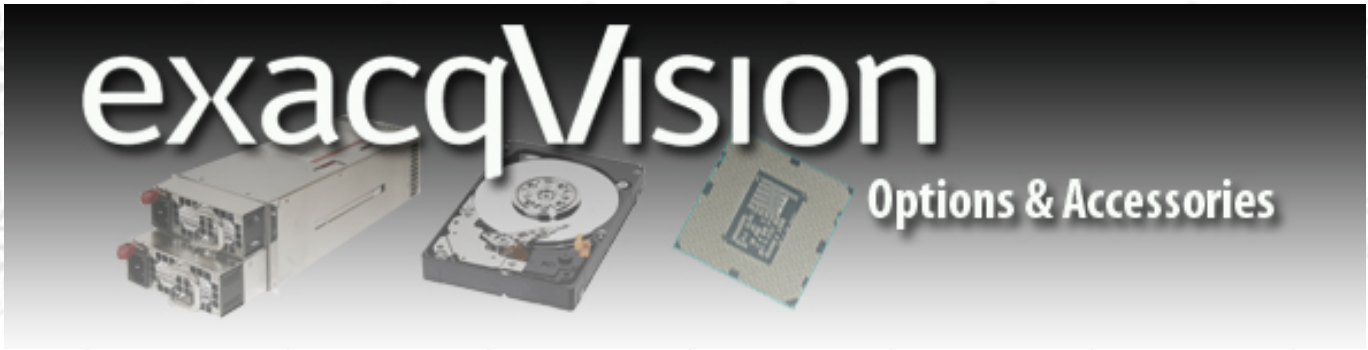

exacqVision Enterprise Server Option

Enterprise Health Manager	Description
---------------------------	-------------

exacqVision Enterprise Health Manager (EHM) is a stand-alone client-server monitoring system for exacqVision video surveillance deployments. It monitors all exacqVision Enterprise-enabled servers and is designed for enterprise deployments where central monitoring of the status of all exacqVision servers is needed.

EHM-01	Enterprise Health Monitor for exacqVision
--------	---

**exacq Mobile Description**

exacq Mobile is an advanced mobile surveillance video control app for exacqVision VMS IP and Hybrid systems. Easy access to live cameras and playback of recorded video for remote surveillance and real-time monitoring. exacq Mobile connects to any number of exacqVision VMS systems with the webservice enabled. exacq Mobile apps are offered at no charge and are downloadable from the iTunes Store and the Android Marketplace.
